

Edible Minus Hydrogen Ion Supplement introduced!

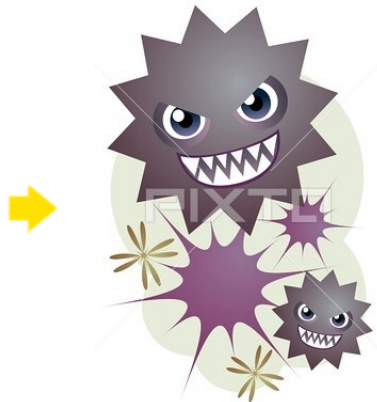

Made from a patented manufacturing process

OKINAWA Coral Calcium + Hydrogen

Active Hydride Plasma

In Automobiles, an Incomplete Combustion releases harmful byproducts, together with CO₂

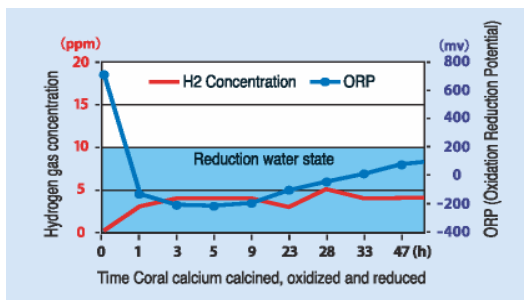

Likewise, in Human Body Cells, an incomplete metabolism releases harmful ROS (Reactive Oxygen Species)

Active Hydride Plasma can continually release strong deoxidization powers within cells, to protect against ROS (Reactive Oxygen Species)

ROS (Reactive Oxygen Species) is said to be involved in about 90% of all diseases. ROS is typically created when about 2% of oxygen taken into the body during breathing, changes into ROS due to chemical changes. However, whenever subjected to influences of stress, intense exercise, cigarette smoke, infrared rays, exhaust fumes, tap water, food additives, etc., ROS levels can increase dramatically. Excessive increase of ROS oxidizes cells, damages DNA, promotes aging, reduces immune strength, and can trigger various diseases such as cancer. ROS is also said to be a cause of lifestyle-related diseases such as diabetes and high blood pressure, as well as arteriosclerosis, myocardial infarction, hepatitis, cataract, and atopy. **Active Hydride Plasma helps remove harmful ROS (Reactive Oxygen Species) and activates metabolism. It can be effective for dieting, and for prevention of lifestyle-related diseases.**

Active Hydride Plasma is produced from a patented manufacturing process. As it reacts with water within your body, Minus Hydrogen Ions are continually released from Okinawa coral calcium.

Active Hydride Plasma was able to generate hydrogen for over for 48 hours in In Vitro research. Within the body, it can continue to effectively combine with ROS to transform into ordinary water, for about 8 hours.

Patent No. 4404657 Japan

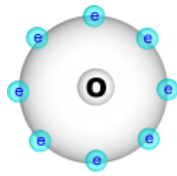

460mg x 90capsules (1-3months)

Made by TAANE which is a best seller of hydrogen-related supplements in Japan

Mechanism of Antioxidant Activity

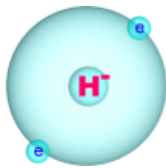

normal Oxygen has 8 electrons

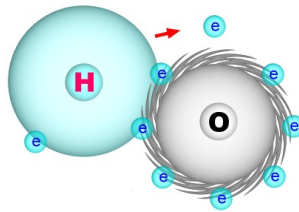

ROS (Reactive Oxygen Species) is formed when an electron goes missing

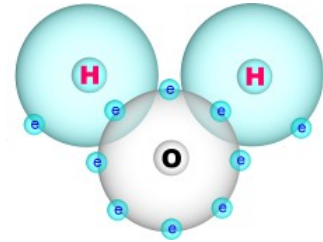

ROS, with reduced electrons, causes various bad influences on the body

"Minus Hydrogen Ion" (Hydride) has two electrons rather than one

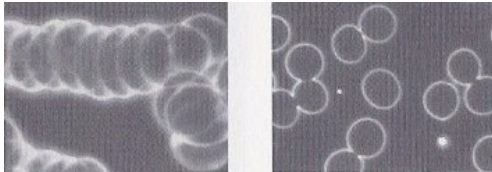

a "Minus Hydrogen Ion" (with 2 electrons) gives its excess electron to an ROS

"Minus Hydrogen Ion" neutralizes ROS, while combining with it, and being removed as H₂O (water)

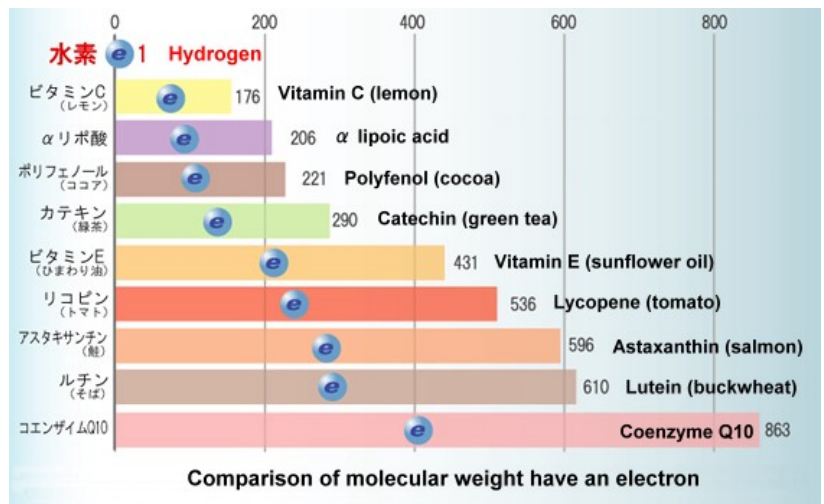

Changes in Red blood cells, before and after

Red blood cells, before (left) and after (right), after applying 400mg of Minus Hydrogen Ion. Red blood cells become active at a fast rate, making blood flow smoothly.

Hydrogen has the smallest molecular weight

The molecular weight of Hydrogen is 1, the smallest size, and this smallness allows Hydrogen to be effective throughout hard-to-reach body cells, reaching even the brain stem. Minus Hydrogen Ion is also believed to activate the Sirtuin Gene (Sirtuin is hypothesized to be linked to longevity).

Comparison of molecular weight have an electron

Inventor: Dr. Oikawa He co-authored the book with a shocking title "Cancer has disappeared!"

Supplement Facts

Serving Size: 2 Capsules	
Servings Per Container: 45	
Amount Per Serving	% Daily Value*
Proprietary Blend: Coral Calcium infused with Hydrogen as Hydride, Calcium, Magnesium, Sodium, Potassium	800mg †
Calcium	312mg 31%
Magnesium	16mg 4%

† Daily Value (DV) not established.
 * Percent Daily Values (DV) are based on a 2,000 calorie diet.

Other Ingredients: Cellulose (capsule)
